Have Cyanobacteria									
Have Brown Diatoms									
Have Algae Problems									
Have Dirty Gravel									
Fish are Lethargic									
When Treating Fish									
After Fragging Corals									
Coral RTN (Rapid Tissue Necrosis)									
Have Waste Build-Up									
Have Smelly Water									
Regular Maintenance									

Primary Product Choice

Second or Follow-Up Product Choice

NOTE: Do not use two or more bacterial-based products on the same day. Allow at least 24h before adding another bacteria product. For best results turn-off your skimmer, UV and ozone for a few hours after adding our products but turn on ASAP if water becomes cloudy. Learn more at www.drTIMSAQUATICS.COM.

QUICK PRODUCT GUIDE

One and Only Live Nitrifying Bacteria 100% Natural

- Eliminates new tank syndrome
- Instantly creates a biofilter
- Removes toxic ammonia and nitrite, naturally
- Cycles your aquarium

One and Only Live Nitrifying Bacteria prevents new tank syndrome by instantly working to establish a biofilter in newly set-up aquaria. Use One and Only to control ammonia and nitrite levels. One and Only Live Nitrifying Bacteria has no sulfur or other offensive odors. Cannot be overdosed. Reef Safe.

First Defense Stress Relief Promotes Healing · Repairs Wounds

Scientifically designed to provide stress relief and support the immune system helping fish cope with stress due to netting, bagging and shipping from the store to your tank, water changes, new fish additions, disease treatments, and other environmental changes. Use while acclimating your fish, in quarantine systems and during water changes.

Clear-UP Water Clarifier 100% Natural

Clears cloudy white water. Clear-UP is a 100% natural water clarifier, consisting of bacteria, with the ability to 'floc' small particles from the aquarium water without the use of the harmful chemicals contained in other water clarifiers such as alum (that contains aluminum) and polyacrylamide (a potentially toxic chemical).

AquaCleanse Tap Water Detoxifier

Eliminates common chemicals in tap water that are toxic to fish and other aquarium creatures with no unpleasant odors. AquaCleanse destroys the chemical bonds that form ammonia, chlorine and chloramines; chemicals that can kill your fish if not eliminated. Use when setting-up a new aquarium and doing large routine water changes.

More Information

This is a quick reference guide for the features and benefits of our products for more information please scan the QR code to go to our website.

Waste-Away Natural Aquarium Cleaner 100% Natural

Sludge and organic busting bacteria that will remove nitrate and phosphate as well as naturally dissolve the sludge and dirt that accumulates in an aquarium and prevent the build-up of debris when used on a regular basis. Also removes dissolved organics. Waste-Away is fast acting and specially formulated to remove aquarium gunk, unclog gravel/coral beds, and keep filter pads freely flowing longer. This results in better water flow, more oxygen and a healthier aquarium environment.

Re-Fresh Fresh Sparkling Water & Clean Surfaces 100% Natural

Revitalizes old, green/brown aquarium water. Re-FRESH is a potent combination of bacteria that work together to maintain clear water, clean aquarium surfaces and eliminate odors. Helps reduce the risk of out-breaks of cyanobacteria and algae in your aquarium by controlling nutrient levels.

Eco-Balance Probiotic Bacteria 100% Natural

Uses friendly probiotic bacteria as a natural way to restore and maintain a balanced aquarium environment that promotes bacteria while helping to reduce the numbers of bad bacteria resulting in a clean, healthy aquarium. Blocks out unfriendly bacteria via competitive exclusion.

NP-Active Pearls for Nitrate and Phosphate Control

A 100% certified biodegradable natural polymer made in the USA that is pure with no fillers or chemicals. Pearls are a food source for bacteria as well as a surface for the bacteria to attach to. Bacteria growing on the Pearls will remove nitrate and phosphate from the water keeping these nutrients away from algae & cyanobacteria. This results in better water quality, cleaner surfaces and a healthier aquarium environment.

Waste-Away Gels Continuous Dosing

Picture
Coming
Soon

Our premier Waste-Away bacteria (see above) encased in a special gel that allows a slow time release of the Waste-Away bacteria into your tank for up to 30 days with a convenient color change occurring when the gel needs to be replaced.
